

**EL-168A**  
(Sliding Gate System)

## Features

Single phase induction motor couple with worm gear speed reducer with manual override release circuitry.

Soft Speed Motor: To buffer shock speed while reaching the ends

Safety Approval: **CE** approved.

## Technical Specification

- Operating Voltage: AC 220-240V 50Hz
- Current: 5A Max.
- Output power: 600W
- Motor Rotation Speed: 1400rpm
- Max. Weight of gate: 1000kg
- Linear Speed: 10m/min
- Transmission Type: Gear Rack and pinion
- safety cut-off /auto reverse: electric load surge detector
- Safety limit timer: yes
- automatic lighting control: yes
- lubrication: oil bath gear motor
- remote controller: 2 channel 330 MH2 UH

## User Guide: Dimension
